SUMMARY

I'm a Cross-Platform Mobile Development graduate from FPT Polytechnic with hands-on internship experience in React Native CLI, and practical project experience with React Native (Expo SDK), Node.js, and RESTful APIs.

I focus on writing clean, readable mobile UI code and understanding how features work end-to-end from backend to client. I'm comfortable collaborating in a team, breaking down tasks by module, reviewing pull requests, and iterating quickly from mentor and user feedback.

TECHNICAL SKILLS

- **Mobile & Frontend:**
  - React Native (CLI & Expo SDK)
  - React Navigation (Stack / Tab)
  - FlatList optimization, Flexbox
  - React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Programming Languages:**
  - JavaScript (ES6+), TypeScript
  - Java (Core, OOP, Swing), SQL, Python
- **Backend & Databases:**
  - Node.js, Express.js (RESTful APIs)
  - MongoDB (Mongoose), MySQL, SQLite3, MS SQL Server
  - Socket.io, JWT Auth, Axios, VietQR / Gemini API
- **Version Control & Tools:**
  - Git, GitHub (Branching, Pull Requests)
  - Postman, Android Studio, VS Code
  - Draw.io (ERD, Use Case), macOS
- **Foreign Languages:**
  - English: Good technical documentation reading and comprehension
- **Engineering & Soft Skills:**
  - Physical device testing (Android / iOS) & APK builds
  - Agile/Scrum teamwork & task coordination
  - Troubleshooting & problem-solving

EDUCATION

FPT Polytechnic College (Ho Chi Minh City) 2023 – 08/2026

- Major: Cross-Platform Mobile Development (Graduated).
- Completed practical coursework in React Native, Java OOP, relational databases, and Agile/Scrum team workflows.
- Built and defended the TroHub Capstone Project (cross-platform room rental management application).

NTT Institute of International Education – NIIE (Previous Study) 2017 – 2021

- Completed foundational Information Technology coursework in an English-instruction environment before transitioning to hands-on software training at FPT Polytechnic.
- Developed technical English reading habits and foundational teamwork skills.

PROFESSIONAL EXPERIENCE

ClinicPro Co., Ltd. 05/2026 – 07/2026

Position: Front-end Mobile Developer Intern

Project: Clinic Management & Appointment Mobile App

- **Project Description:** A cross-platform healthcare mobile app for appointment booking, doctor directory lookup, electronic medical records (EMR), and medicine cart management.
- **Responsibilities:**

  Built UI screens and navigation flows (authentication, doctor/specialty lists, booking/cancellation forms, EMR views, medicine cart) using React Native CLI, Flexbox, and React Navigation (Stack/Tab).

  Integrated Node.js/MySQL RESTful APIs via Axios, handled loading and error states, implemented search/filter/sort features, and optimized list rendering with FlatList.

  Tested across physical Android (including older devices and notch screens) and iOS devices, monitored memory usage, and packaged test/release APKs.

  Iterated on UI/UX layouts based on mentor code reviews and feedback from clinic doctors and users.

Ship Tot One Member LLC 01/2021 – 06/2024

Position: Technical Support & Operations Coordinator

- **Responsibilities:**

  Provided technical support and troubleshooting for day-to-day software issues within the company's logistics operation system.

  Managed operational data and delivery workflows, maintaining data accuracy under tight timelines.

  Collaborated across teams to diagnose bottlenecks and resolve system or process issues.

PROJECTS

TroHub – Boarding House Management System (Capstone Project) 05/2026 – 08/2026

Role: Mobile Developer (React Native) & Team Coordinator | **Team Size:** 5

- **Project Description:** A cross-platform application helping landlords and tenants manage rooms, digital contracts, utility billing, and VietQR payments across mobile and web.
- **Responsibilities:**

  Built core mobile screens and user flows using React Native (Expo SDK) with Light/Dark theme support across 8 functional modules aligned with the Next.js WebAdmin.

  Implemented utility meter scanning via Expo Camera and integrated Google Gemini API as an assistant for landlord workflows.

  Contributed to Node.js/Express/MongoDB RESTful APIs (JWT auth, Landlord/Tenant roles, Socket.io notifications, VietQR payments).

  Drafted the initial ERD, documented shared coding conventions, split tasks by module, and reviewed Pull Requests before merging.

ReadVibe – E-book Store Mobile App (Coursework Project) 2025

Tech Stack: React Native (Expo), Context API, REST API

- Built core e-commerce mobile screens including catalog browsing, product filtering, search, and shopping cart management.
- Optimized rendering performance for large book lists using React Native FlatList and connected RESTful APIs for data synchronization.

Social Post Curator & Chrome Extension (Personal Project) 09/2026 – 11/2026

Tech Stack: Python, SQLite3, Chrome Extensions API, OpenAI / Gemini API

- Built a local-first archiving tool with Python/SQLite3 and a paired Chrome Extension to save social posts locally, supporting optional AI summarization and keyword search.

ACTIVITIES & LINKS

- Source code and personal projects are maintained on GitHub: https://github.com/shenjohnsons11
- Enjoy reading clean code and mobile engineering articles, building small productivity tools, and practicing React Native performance optimization.
